RILEY H. ALLEN -

CALLING OUT A MILLION.

States would mean the assembling of an army of threatened, and on one occasion actually broken by nounced examples of advancement is important government officers and at least a million men, does not strike the average the enemy. Think of what a mess an unprepared Bikaner, which ranks among the high- residences. Sanitation is a hobby of American citizen as an undertaking of any magni- government would make of trying to distribute ratude, especially when our enthusiasm is running tious to a million men covering a territory many Bikaner, a descendant of the famous down and replaced where necessary. high. The statement has been made by one of the miles in extent! country's best known men-Bryan-that the sun. Between fighting the enemy, keeping the million- broad-minded and progressive princes water supply system is being installed.

ern border became intolerable, President Wilson sent trigger enthusiasts do not stop to reckon. out a call for 20,000 men, and at the end of the first three weeks the recruiting officers reported but one from getting ready. quarter of that number, which is evidence of a shyness in joining the army when actual duty is in sight, even such spectacular service as might be expected in the land of the cacti.

has been enacted and discarded regarding the Unitmen would not come until war had actually been by advertising. declared, or to protect our coasts and borders from strued as a hostile act. It was this same act, per- advertising results as follows: formed before war was declared, that precipitated the struggle in Europe.

Supposing that the call has been made for a mil-Hon men, the reason being justifiable, and the need for the country's safety pressing, what then?

The first move would be to get the men; one million of them; representing ten armies, each of the size and strength of the present fighting land forces of the United States. Allowing that the men were recruited, then comes organization, then training, the equipment. This latter condition is a problem to be reckoned with. Following is a partial list of ticles of equipment, not only essential but neces sary to place a million men in fighting trim, as figured out by the war department:

Seven hundred and fifty thousand rifles and bayonets for them to fight with.

Two hundred and sixty-five thousand pistols. Eight thousand machine guns,

Two thousand one hundred fold guns to bat-

ter down attack. One hundred and sixty-five million cartridges to carry them into their first fight, and as many

more for each succeeding fight Two million five hundred thousand shells and shrapnel for our field guns for every hour they

are in action. One hundred and ninety-six thousand horses to carry them and pull their carriages.

One hundred and twenty-seven thousand mules to haul their supplies and pack their

Eight thousand wagons to transport their supplies and ammunition. One million cartridge belts for their ammuni-

One million first-aid packets to bind up their

One million canteens.

Each of them must have a uniform and equip-

One million shelter halves to protect them

One million pouches to keep them dry. Two million blankets to keep them warm.

Two million pairs of shoes. | Two million uniform coats, breeches, leggings,

suits of underwear.

One million hats. Two million shirts.

Four million pairs of socks,

One million haversacks to carry their equip-

An army of a million newly-made soldiers would t is figured out, be in need and very much in need of the guiding hands, brains and experience of about 25,000 proficient officers. How near that number can we come in furnishing officers to take command of a million men? This is the largest problem. We might buy all other paraphernalia of war but we cannot buy ready-made officers.

If invasion should take place in the near future, the brunt of the attack would have to be borne by a few thousand "regulars" until such time as rein forcements of near-soldiers, minus uniforms, and ed invaders. Men of a few weeks' instruction would power, or jaw-bone?-Boston Advertiser. be thrown into the field with the expectation that they would accomplish what officers of years of

Census experts make the emphatic statement that Woodrow Wilson. he U.S. has over 17,000,000 men of military age, still would be considered extremely good work to raise The next "leak probe" is going to be held in Beran army of a million men in one year, and perfect lin, with Zimmermann and Bernstorff as the star them in the tactics of war to an extent that they could be sent into the field as soldiers worthy of the name. The lack of equipment would be our bigcest stumbling block, and this would be emphasized for the senators in the next few months. by a very decided shortage in the number of instructors, and the army, in its present condition, could spare but few of its officers.

The vivid personification of unpreparedness would be brought home to us in a most realistic manner | "Tis a slow day when no German plot is revealed."

WEDNESDAY MARCH 7, 1917, when we sent the million of half-baked, undertrained, poorly equipped soldiers against an equally numerous but fully equipped and trained foe.
